

## Project Overview

As of May 3, 2013

## American Addition Improvements: Phase 1

### Description and Benefits:

The city of Columbus has completed plans for Phase 1 of improvements in the historic American Addition neighborhood. Work in the first phase will upgrade road conditions, add pedestrian safety features and improve stormwater drainage. Work on later phases is subject to the availability of funding.

#### *Phase 1 (shaded area on map below)*

Improvements will be made on Woodford Avenue, Twelfth Avenue, Sigsbee Avenue, Lee Avenue, Sampson Avenue and alleys, including:

- Reconstructing existing roadway
- Constructing new sidewalks, *Americans with Disabilities Act*-compliant curb ramps, gutters, curbs, storm drainage system and water lines
- Adding street lights
- Planting street trees
- Updating traffic signs and pavement markings

The project also includes innovative green features such as rain gardens and pervious concrete curbs.

### Status:

Design completed; right-of-way acquisition in progress.

### Construction Schedule (tentative):

- Utility work (gas, water, electric, cable): January 2013 – July 2013
- Roadway improvements: October 2013 – December 2014
- Access to all properties will be maintained during construction

### Construction Cost:

Estimated \$6 million
